

All about RingCentral Phone

Now we're talking.

Keep your business up and running with a reliable, enterprise-grade phone system that offers critical PBX features such as HD voice, advanced call routing, business SMS, voicemail, and fax. In addition to a modern phone system, enjoy a unified, secure, and seamless experience on one single platform for video, chat, and voice. With RingCentral, it's easy to stay connected with employees and customers.

Let's take a look at some RingCentral Phone features.

Business phone number

Make a business phone number and extension available to each user, so personal numbers remain private. Communicate freely anywhere in the US and Canada, whether internally or externally.

Emergency services and nomadic E911*

Make emergency 911 calls from any RingCentral endpoint. Your current registered address (whether you're in the office or remote) is made available to the emergency response center.

Port existing numbers or choose new ones

Select new local, toll-free, and vanity numbers or port existing numbers into the RingCentral system.

Presence

Integrate your company directory, making it easy to search for coworkers, view their availability, and call them.

Voicemail with transcription and email notifications

Listen to voicemails from any device, or when busy, simply stay informed with transcriptions or voicemail messages delivered straight to your email.

Internet fax

Send and receive faxes using your desktop, mobile, or tablet. Attach files from your local or cloud storage solutions, and even add a cover page if needed.

Caller ID and name

Easily manage your incoming and outgoing caller IDs and choose to display your business name when making calls.

Business SMS and MMS

Send 1:1 or group text messages from your business phone number.

*Refer to the [RingCentral Emergency Services Policy](#) for more details.

Call history and log reports

View a complete record of your inbound and outbound calls, voicemails, and faxes, synced across all devices in real time.

Call monitoring

Whisper, monitor, barge, or takeover customer calls to train team members and ensure superior customer satisfaction.

Call screening and blocking

Take calls from particular callers, block specific numbers, and send others directly to voicemail.

Heads-up display (HUD) and call delegation

View real-time presence of user extensions so delegates such as admin assistants can efficiently manage multiple calls.

Paging and intercom

Make short announcements or have quick conversations with built-in intercom and paging.

Spam notification

RingCentral's AI-powered framework detects and labels suspected robocalls as such, with the option to block calls at the user or company level as needed.

Auto-attendant and IVR editor

Never miss a call with an extended phone menu and advanced call routing rules. Easily make changes on the go with a visual editor.

Greetings and music on hold

Use greetings to enhance your brand and company's image and keep callers entertained and informed with music and messages while they're on hold.

Hot desking

Enable users to log in to shared phones to access their own RingCentral extensions, voicemail and greetings, and other features.

Shared lines

Share one phone number across multiple phones, and answer calls from any phone.

Call transfer

Make a warm or cold/blind live call transfer to the desired number or directly to someone's voicemail.

Call recording

Record calls manually or even automatically, and store them in the cloud for easy access later.

Call park

Hold incoming calls in a public or private virtual location to be retrieved by a user using another RingCentral endpoint.

Call flip

Seamlessly move a call between your desk phone, softphone, or cell with no interruptions.

Call to video

Drive quality interactions and productivity by seamlessly escalating a phone call to a video meeting with just one tap.

Call forwarding

Going to be away? Set rules to forward your calls to any extension, internal or external phone number, group, or department to ensure they always get answered.

Audio conferencing

Every user in the system can use their unique access codes to host and invite up to 1,000 participants to audio-only conference calls.

Department call queues

Have a sales or support team? Set rules to greet, route, and distribute callers to members of a specific team and ensure every call is appropriately managed.

Device choices

Interact with your company or personal contacts anywhere, anytime, using robust desktop or mobile apps on your preferred device. Prefer to use a desk phone, [browse](#) our wide variety of supported devices.

And there is more

Secure and reliable

Depend on every call with carrier-grade infrastructure delivering industry-leading 99.999% uptime SLA and enterprise grade security.

Easy to set up and manage

Manage your entire system and all your global users through a centralized administrative portal. Users manage their own settings via their personal portal.

Global availability

Got global business needs? We got you, with a local solution in 40+ countries and number availability in 100+ countries.

Robust analytics

Manage teams easily and stay on top of system health with adoption and usage metrics, device status, and quality of service details.

Integrations

Drive business efficiency and productivity by integrating phone features into your favorite business apps—or build your own with open APIs.
