All about RingCentral Phone

Now we’re talking.

The ringtone is the heartbeat of global communications and voice is the interface for human connection. Voice underpins the critical communication tools we rely on, from calling to video conferencing, and no one has the combination of cloud PBX capabilities, advanced analytics, and open platform to fuel the new age of voice like RingCentral.

RingCentral offers the #1 business phone system. Customers enjoy a phone with integrated messaging, video, SMS, fax, AI, analytics, mobile-first capabilities, embedded apps, and APIs to optimize efficiencies with uncompromising security.

Let’s take a look at some RingCentral Phone features.

**Business phone number**
Make a business phone number and extension available to each user, so personal numbers remain private. Communicate freely anywhere in the US and Canada, whether internally or externally.

**Emergency services and nomadic E911**
Make emergency calls from most RingCentral endpoints. We transmit the address you provided us to the emergency response center. Please see our Emergency Services Policy for more information on how our emergency calling services work.

**Enhanced business SMS and MMS**
Send 1:1 or group text messages from your business phone number.

**Port existing numbers or choose new ones**
Select new local, toll-free, and vanity numbers or port existing numbers into the RingCentral system.

**Voicemail transcriptions and email notifications**
Listen to voicemails from any device, or when busy, simply stay informed with transcriptions or voicemail messages delivered straight to your email.

**Caller ID and name**
Easily manage your incoming and outgoing caller IDs and choose to display your business name when making calls.

**Presence**
Integrate your company directory, making it easy to search for coworkers, view their availability, and call them.

**Internet fax**
Send and receive faxes using your desktop, mobile, or tablet. Attach files from your local or cloud storage solutions, and even add a cover page if needed.

*Refer to the RingCentral Emergency Services Policy for more details.
Call history and log reports
View a complete record of your inbound and outbound calls, voicemails, and faxes, synced across all devices in real time.

Call monitoring
Whisper, monitor, barge, or takeover customer calls to train team members and ensure superior customer satisfaction.

Call screening and blocking
Take calls from particular callers, block specific numbers, and send others directly to voicemail.

Heads-up display (HUD) and call delegation
View real-time presence of user extensions so delegates such as admin assistants can efficiently manage multiple calls.

Paging and intercom
Make short announcements or have quick conversations with built-in intercom and paging.

Spam notification
RingCentral’s AI-powered framework detects and labels suspected robocalls as such, with the option to block calls at the user or company level as needed.

Auto-attendant and IVR editor
Never miss a call with an extended phone menu and advanced call routing rules. Easily make changes on the go with a visual editor.

Greetings and music on hold
Use greetings to enhance your brand and company’s image and keep callers entertained and informed with music and messages while they’re on hold.

Hot desking
Enable users to log in to shared phones to access their own RingCentral extensions, voicemail and greetings, and other features.

Shared lines
Share one phone number across multiple phones, and answer calls from any phone.

Call transfer
Make a warm or cold/blind live call transfer to the desired number or directly to someone’s voicemail.

Call recording
Record calls manually or even automatically, and store them in the cloud for easy access later.

Call park
Hold incoming calls in a public or private virtual location to be retrieved by a user using another RingCentral endpoint.

Call flip
Seamlessly move a call between your desk phone, softphone, or mobile with no interruptions.

Call to video
Drive quality interactions and productivity by seamlessly escalating a phone call to a video meeting with just one tap.

Call forwarding
Going to be away? Set rules to forward your calls to any extension, internal or external phone number, group, or department to ensure they always get answered.

Audio conferencing
Every user in the system can use their unique access codes to host and invite up to 1,000 participants to audio-only conference calls.

Department call queues
Have a sales or support team? Set rules to greet, route, and distribute callers to members of a specific team and ensure every call is appropriately managed.

Device choices
Interact with your company or personal contacts anywhere, anytime, using robust desktop or mobile apps on your preferred device. Prefer to use a desk phone, browse our wide variety of supported devices.
Easy to set up.
Easy to use.
Easy to manage.
