

Engage messaging

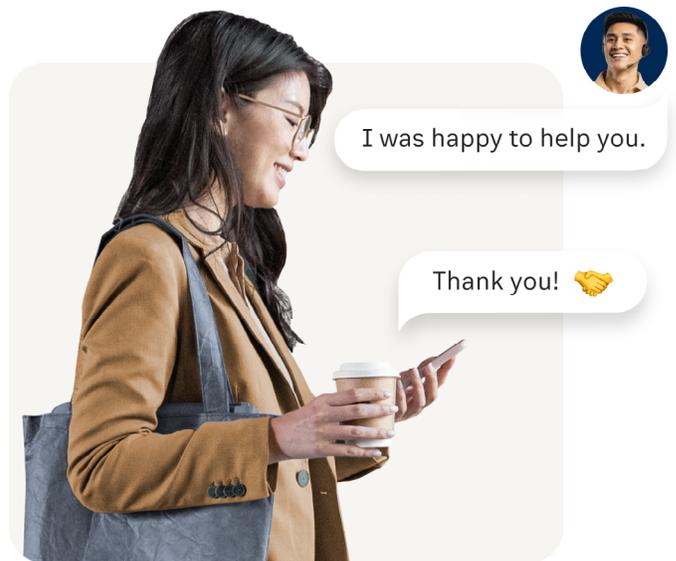

Keep the conversation going with customers - across any device they use

When given the choice, 75% of customers prefer to use private messaging over traditional customer service channels. Messaging is now a part of our daily habits and it is essential for businesses to integrate messaging services into their customer engagement strategy for a flawless experience. Engage Messaging combines live-chat functionality with messaging. Available on mobile or desktop, it guarantees a continuous conversation across all your customers' devices for a better experience.

Conversational messaging

Engage Messaging allows customers to engage or continue a conversation with a brand at any time and from any device. With fast-asynchronous channels, a brand offers possibility for their customers to contact them even when no agent is online. If necessary, conversations can be continued over time. Agents have the ability to close a conversation if required, to keep independent threads.

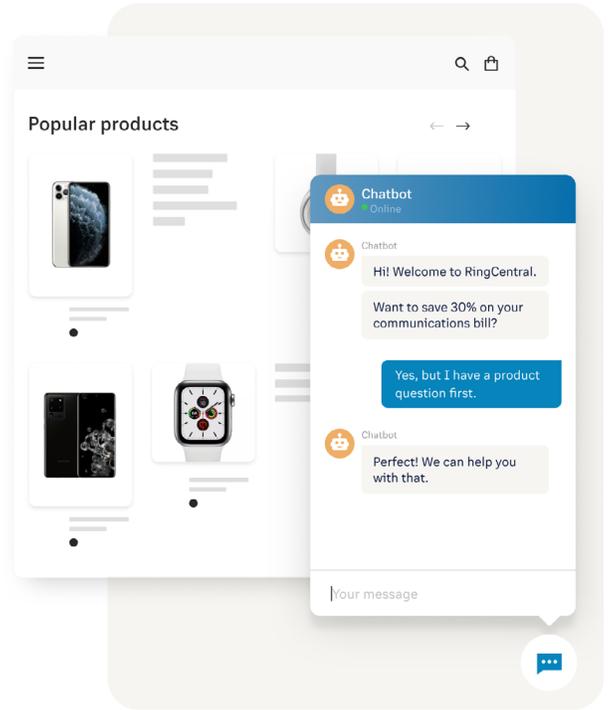

Evolution of live-chat

Live-chat is a great tool to assist online sales and increase conversion rates. However, it requires having the agent and visitor connected at the same time to be able to start a conversation.

Whether they are authenticated or not, visitors can initiate a conversation and continue it later with Engage Messaging.

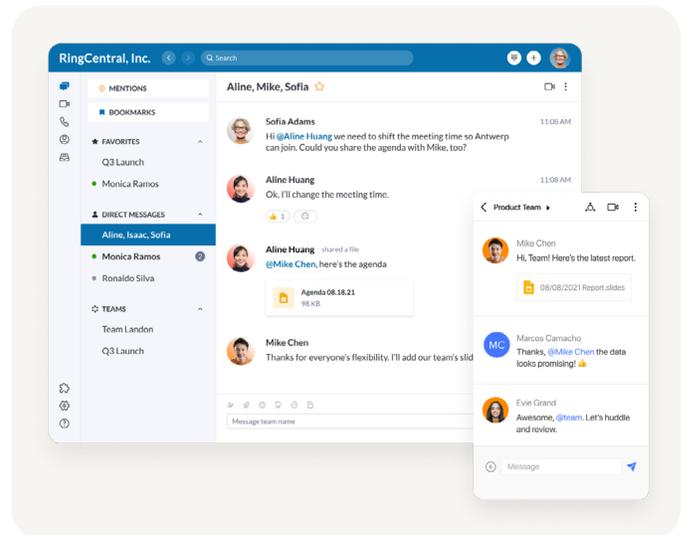

- Logged-in customers receive a notification on their mobile or by email when they receive a reply from the agent.
- Non-authenticated visitors will be able to receive browser notification when using Chrome or Firefox.
- Conversation can be prompted automatically using triggers from selected actions on website.

History of conversations

Engage Messaging keeps a history log of all previous conversations that can be continued at any time either from customer or agent.

- Full context from previous conversations available for agents
- Keeps track of past discussions with unlimited number of logged conversations
- Centralized conversations on the customer's account page
- Easy to navigate between past conversations
- Message history is available on mobile and desktop

Content rich

Engage Messaging supports rich content for customers and agents to exchange easily and seamlessly:

Providing value across industries

“Social media messaging services represent the next paradigm of interactions with customers. These types of interactions are a game changer. Without a tool like RingCentral Engage Digital, it wouldn't have been possible for our company to enable one-to-one interactions with customers on so many touch points.”

– Harald Felgner, Digital Experience Designer,
Product Individual & Mobile Solutions

LA REDOUTE

“Messaging is a good alternative to social media. It enables direct exchanges, more human contacts, and a closer relationship with our customers.”

– Marine Vannier, Customer Service Project Manager

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact center solutions based on its powerful Message Video Phone™ (MVP™) global platform. More flexible and cost effective than legacy on-premises PBX and video conferencing systems that it replaces, RingCentral empowers modern mobile and distributed workforces to communicate, collaborate, and connect via any mode, any device, and any location. RingCentral offers three key products in its portfolio including RingCentral MVP™, a unified communications as a service (UCaaS) platform including team messaging, video meetings, and a cloud phone system; RingCentral Video®, the company's video meetings solution with team messaging that enables Smart Video Meetings™; and RingCentral cloud Contact Center solutions. RingCentral's open platform integrates with leading third-party business applications and enables customers to easily customize business workflows. RingCentral is headquartered in Belmont, California, and has offices around the world.
