RingCentral for Google integrations

Seamlessly connect your RingCentral communications and collaboration solution with Google Cloud to create a powerful business communications hub.

RingCentral’s Google Workspace integrations are built directly into Google’s platform and are designed to streamline business communications and collaboration across the Google applications you use every day.

- Fax Google Docs instantaneously with the RingCentral Fax® plugin.
- Use the RingCentral Google Workspace Add-on to check access and message your contacts within the context of your Gmail conversations.
- Quickly schedule a RingCentral Video meeting within your Google Calendar invites.
- Seamlessly evolve your chat conversations into face-to-face video calls with RingCentral for Hangouts.

Benefits

**Seamless integration with Google applications**
Connecting RingCentral with the business applications you use every day allows you to automate tedious tasks in your workflow for added efficiency and ease of use.

**Productive team collaboration**
Integrated fax and conferencing capabilities enable your teams to instantly evolve their team conversations as needed, keeping projects moving forward in a productive way.
Integrations

RingCentral Fax plugin
Fax Google Docs instantaneously to any of your business contacts.
- Send to multiple fax recipients.
- Customize the fax cover page.

RingCentral for Hangouts Chat
Improve team collaboration by invoking the RingCentral bot into your Google Hangouts Chat conversations to initiate RingCentral video and audio conferences. Simply type the following commands to access critical RingCentral functionalities.
- @RingCentral meet: Start a video conference with RingCentral Meetings™.
- @RingCentral call: Start an audio call with RingCentral Phone™.
- @RingCentral help: View all available command options.

RingCentral Google Workspace Add-on
With the RingCentral Google Workspace Add-on enabled, enjoy easy access to RingCentral in Gmail and Google Calendar applications.
Surface key information within your Gmail application to access and message your contacts within the context of your email conversations.
- View presence of RingCentral contacts.
- Review recent call history.
- Make outbound phone calls.
- View and send SMS messages.
Quickly populate RingCentral Video meeting details into Google Calendar invites.
- Schedule a meeting from the Google Workspace Add-on sidebar.
- Configure RingCentral Video meeting settings: use a personal meeting ID, use end-to-end encryption, require a meeting password, enable waiting rooms, and more.
- Join meetings from within Google Calendar.

How it works

RingCentral Fax plugin
After you download the RingCentral Fax plugin from the Google Docs add-ons menu, you can instantaneously fax important documents and even customize the cover page.

How it works
RingCentral Google Workspace Add-on

Get the RingCentral Google Workspace Add-on from the Google Workspace Marketplace and sign in to RingCentral only once to view, call, and message contacts within a Gmail conversation as well as schedule RingCentral Video meetings in Google Calendar.

RingCentral for Hangouts Chat

When Google Hangouts Chat is enabled for your domain, you can add the RingCentral bot to any Hangouts Chat room and use simple command prompts to initiate RingCentral video and audio conferences.
System requirements

- RingCentral for Google integrations are available to all RingCentral MVP® customers.
- You must have an active Google account.
- Windows XP (or later) or Mac OS X 10.8 Mountain Lion (or later) operating systems are required.
- Chrome 30 (or later).
