

Professional Services™ RingCentral Rooms™ Deployment Service

Get expert design, installation, and configuration help to easily bring state-of-the-art HD video, audio, and online meeting capabilities to any conference room.

What is the RingCentral Rooms Deployment Service?

RingCentral Rooms transforms any conference room space into a dynamically enabled web-conferencing destination. Using existing or off-the-shelf equipment, you can easily set up, conduct, and manage high-quality web conferences in small huddle spaces, medium-sized conference rooms, or larger training rooms.

The RingCentral Rooms Deployment Service provides the technical expertise needed to create an “in-room” experience for your audio and video-enabled collaboration meeting spaces. Our Professional Services team can take care of every aspect of the deployment—from design and planning, to installation and training.

Technical overview

RingCentral Professional Services experts will create an optimal HD telepresence video-conferencing set-up in all of your meeting spaces. While the elements of our deployment service vary by product and number of meeting rooms, all include:

Planning and design

If necessary, our experts will schedule an on-site survey to work with your team to plan and design the right solution for audio and video-enabled conference rooms. We take every aspect of your conference room space into account, producing dimensional drawings, hardware recommendations, and other essential materials needed for proper installation.

Installation

Following the initial design phase, we will work with you to schedule equipment delivery and installation services. RingCentral professionals have the experience needed to quickly and accurately install the hardware and software for RingCentral Rooms, while also minimizing disruption to your existing environment.

Implementation

Our professionals will work with your IT administrators to properly configure the RingCentral Rooms software. To simplify your conference scheduling and calendar synchronization, we can also integrate RingCentral Rooms with your existing Google, Microsoft Office 365™, or Microsoft Exchange® installation, minimizing disruption to your existing environment.

Training

RingCentral will hold one to two remote training sessions for your IT administrators on features and best practices.
