

Room Connector

Connect your meeting rooms that have existing third-party SIP-based hardware to RingCentral video meetings.

You don't need to buy all-new equipment to get started with RingCentral video meetings. Unlock your existing third-party SIP-based video conferencing hardware with Room Connector to enjoy the RingCentral experience in your meeting rooms.

Benefits

Consistent experience in your meeting rooms

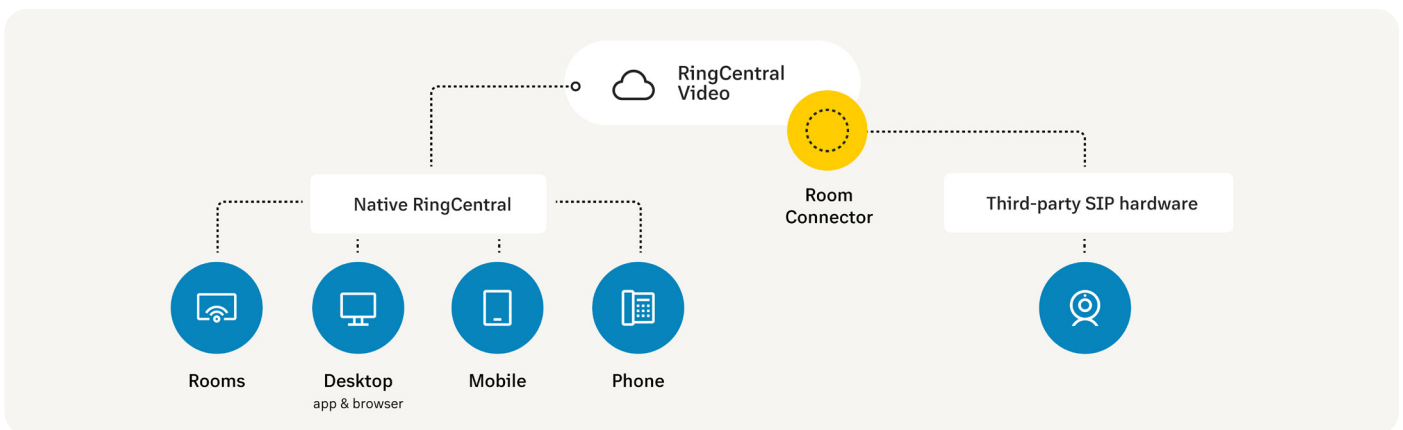

Get an intuitive and consistent user experience in the conference room regardless of whether you are using third-party SIP hardware or RingCentral Rooms.

Use your current equipment

No need to rip out existing room hardware setups. Keep and use the equipment you already have.

Save on costs

Leverage existing equipment and maximize return on investments by connecting to RingCentral's video meetings without needing to purchase brand new equipment.

Room Connector brings video to any size room on SIP-based video hardware

- Conference rooms
- Executive offices
- Huddle rooms
- Training rooms

Difference between Room Connector and RingCentral Rooms

RingCentral Room Connector is an add-on license that allows customers to connect existing SIP-based endpoint devices and connect to RingCentral video meetings.

RingCentral Rooms is a separate add-on license that allows customers to have video conferencing in meeting rooms based on our Video product.

Room Connector

- Extend the life of your existing SIP-based hardware by allowing them to connect to RingCentral video meetings.
- Use with SIP-based third-party video hardware from Poly, Cisco, and others.
- Connect to RingCentral using the room conferencing user interface of the existing hardware.
- The hardware can only be a meeting participant, not a meeting host.
- Cannot start instant meetings.

RingCentral Rooms

- Get the latest conference room technology for the best experience with the native RingCentral Rooms user interface.
- Use with various supported Rooms kits and appliances.
- Zero Touch Room features include proximity share, mobile-to-Room switch, phone as a controller, and voice commands.
- Configure advanced management features from the Analytics portal.
- Meeting management features include manage participant list, chat, and invite participants.
- The hardware can participate in and host RingCentral video meetings.

Key features

Easy meeting connections

Easily join a meeting using a SIP address.

One-touch calendar join

Join meetings with one touch through calendar integrations on supported Poly* and Cisco hardware.

Consistent and unified experience

Enjoy a consistent experience that is seamless across RingCentral Rooms, Room Connector, desktop, and mobile.

HD audio and video

Join meetings in HD (up to 1080p) on supported devices.

Simple and interactive welcome screen

Easily join meetings with a simple and intuitive app-like experience. Coming soon.

Secured and protected meetings

Protect your meetings with supported features such as waiting rooms and passwords, and prevent unauthorized users from joining.

How to buy

Room Connector is available as an add-on license with the purchase of a paid plan (RingCentral Video Pro+ or RingCentral MVP™ Standard, Premium, or Ultimate edition) and complements the existing RingCentral video experience in meeting rooms. Room Connector is a separate license from RingCentral Rooms, and whether you

need one or both depends on your hardware setup for each meeting room. As a current RingCentral customer, you can also purchase a Room Connector license directly from your admin portal. Contact a RingCentral account representative to learn more or visit ringcentral.com/office/rooms.

Getting started

Three quick steps to get started:

1. Purchase your Room Connector license

2. Schedule a video meeting

3. Join the meeting using the Room Connector!

* Requires Poly One-Touch Dial service

For more information, please contact a sales representative. Visit ringcentral.com or call 855-774-2510.

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact center solutions based on its powerful Message Video Phone™ (MVP™) global platform. More flexible and cost effective than legacy on-premises PBX and video conferencing systems that it replaces, RingCentral empowers modern mobile and distributed workforces to communicate, collaborate, and connect via any mode, any device, and any location. RingCentral offers three key products in its portfolio including RingCentral MVP™, a unified communications as a service (UCaaS) platform including team messaging, video meetings, and a cloud phone system; RingCentral Video®, the company's video meetings solution with team messaging that enables Smart Video Meetings™; and RingCentral cloud Contact Center solutions. RingCentral's open platform integrates with leading third-party business applications and enables customers to easily customize business workflows. RingCentral is headquartered in Belmont, California, and has offices around the world.
