# Netgear N750 configuration guide

RingCentral® certified router

Configuring QoS on the Netgear N750 to Prioritize VoIP Traffic

Brand: NetGear
Model: N750
Hardware Version: WNDR4000
Firmware Version: V1.0.0.90_9.1.79

1. Open your browser and navigate to **http://192.168.1.1**.

2. Log in to the router. The default username is "**admin**". The default password is "**password**".

3. Select the "**Advanced**" tab and the select "**WPS Wizard**" on the left hand side.

4. Select "**Setup**".

5. Select "**QoS Setup**".

6. Check the box next to "**Turn Internet Access QoS On**" if not already checked.

7. Check the box next to "**Turn Bandwidth Control On**".

QoS Setup

Apply ▶   ✕ Cancel

☑ Enable WMM (Wi-Fi multimedia) settings

☑ Turn Internet Access QoS On   **6**

☑ Turn Bandwidth Control On   **7**
　⦿ Uplink bandwidth Maximum 2   Mbps ▾
　◯ Automatically check Internet Uplink bandwidth   Check

8. Select the "**Uplink bandwidth Maximum**" radial button.

☑ Turn Bandwidth Control On   **9**
8 ⦿ Uplink bandwidth Maximum 2   Mbps ▾
　◯ Automatically check Internet Uplink bandwidth   Check

9. In the field to the right of the radial button enter in your current upload speed. (If unsure of the current upload speed, run a speedtest at http://www.ringcentral.com/support/capacity.html).

10. Be sure to save any changes and reboot the router before proceeding.

QoS Setup

10
Apply ▶   ✕ Cancel

11. Your QoS should now be configured.
