

# RINGCENTRAL OFFICE® RAPID DEPLOYMENT

Organisations around the world are struggling with the need to support their customers while their offices are closing. As your business navigates potential emergencies that force your employees to work remotely, RingCentral is fulfilling your business communications needs by rapidly deploying the world-class RingCentral Office platform, enabling you to collaborate, communicate, and work as a team to serve your customers even while you are working from home, remote offices, and different locations.

## SERVE YOUR CUSTOMERS WITHOUT INTERRUPTION

RingCentral's cloud-based Office solution allows your employees to be up and running in no time, taking calls and servicing customers. RingCentral's collaborative Office capabilities include:

- Phone: Make and receive all your calls from your mobile devices with a softphone.

- Video meetings: HD-quality audio and video conferencing, screen sharing, and more.
- Messaging: Team messaging that's perfect for collaboration, with file sharing and more.

## WHAT IF...

You could quickly deploy a cloud-based communications solution that allows you to seamlessly continue serving your customers working from home?

Your employees had a simple-to-learn desktop with powerful collaboration and team messaging tools to make their job easy and efficient from any location?

Your administrators and supervisors had all of the capabilities they needed to keep on top of your customer experiences?

## OUR OFFER

Be up and running within 48 hours to take calls and service customers from any location in a single unified experience.

Designed for mobile and distributed workforces.

The powerful, easy-to-use interface enables administration from anywhere, including mobile devices.
