

# Successful teachers benefit from the power of connection

RingCentral Glip™ is the modern digital workspace that **unites teachers, students, and parents** with team messaging, file sharing, video, and task management.

## Teachers

Teachers spend between three to five hours a day not teaching. They're planning and performing administrative tasks like answering emails, making phone calls, and holding teacher-parent conferences. Seventy-four percent of teachers support the use of technology in schools.<sup>1</sup>

RingCentral Glip provides teachers and administrators a convenient and productive digital workspace.

- Teachers can easily coordinate lessons between fellow teachers and education specialists.
- Communications and planning are better synchronized between teachers and admins.
- Lessons can be recorded and archived—extending the reach of curriculum while saving resources.

74% of teachers state they need student-centered technology and resources.<sup>1</sup>

50% of teachers feel time for teachers to collaborate is important.<sup>2</sup>

## Parents

Parents get a digital communications space that gives them a stronger connection with teachers.

- Parents and guardians get to connect using preferred mediums, including voice, text, and video.
- Teachers can easily share updates, homework details and schedules, send newsletters, and direct messages.
- It's easier for parents and teachers to coordinate special events, including field trips, parties, and parent-teacher conferences.

66% of parents feel they were not kept in the loop when it came to classroom activities.<sup>3</sup>

2:1 parents favor digital communications.<sup>4</sup>

## Students

Students gain an effective digital learning space that modernizes their education.

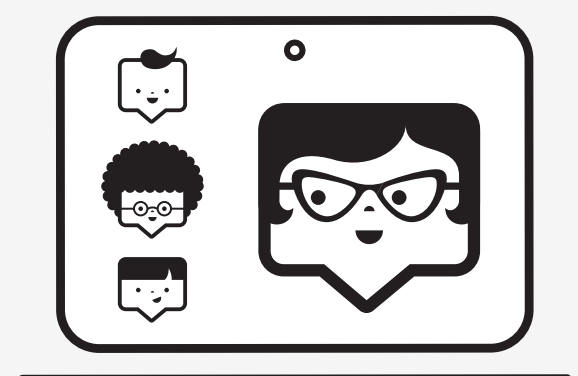

- Students receive lessons and connect with their teachers anywhere across messaging, video, and file sharing.
- Pupils can connect with teachers online during office hours and receive tutoring and feedback with more flexibility.
- Learners have a digital platform to showcase their work and can use technology that will give them tech skills for the future.

71% of academic leaders rate online learning as effective.<sup>5</sup>

6.5% is the increased probability that students earn credits in classes where weekly teacher-to-parent messages are exchanged.<sup>6</sup>
