RingCentral
for classrooms

Virtual learning is now in session.

THE BENEFITS FOR STUDENTS:

- A cloud education platform gives students **access to education anywhere, anytime**.

- On-demand video learning enables students to work productively around their schedule or manage their time around their parents' respective commitments and time restraints whilst at home.

- Learners can access resources via an **easy-to-use app**, which is compatible with multiple different devices.

- Pupils can benefit more from **open two-way communication** in an online learning environment than a more formal one-way classroom structure.

- **Digital natives** can benefit from more engaging, interactive learning content and multimedia resources such as **video**.

- Learning resources are hosted online so students can access them quickly and easily all in one easy-to-use platform.

THE BENEFITS FOR STAFF:

- Staff can effectively enable education to take place anytime, anywhere.

- Teachers can truly **maximise** both asynchronous and synchronous learning methods using **video, chat,** and **audio** functions.

- Send and receive class messages in groups or one-to-one for discrete and **secure internal staff communication**.

- Communicate with parents, administrators, and students in real time and while on the move.

- Record, save, and share virtual video classroom content to avoid wasting time on repetition.

- Use **annotations** to mark homework and coursework, or review lesson plans and resources.

- Connect students, staff, and parents all in one safe, reliable cloud education solution.

WHAT'S INCLUDED:

- **HD video meetings:** Up to 200 people can participate in your standard meeting (Large Meetings scale to 500 participants).

- **Screen sharing and digital whiteboarding:** One-click HD screen sharing—video, audio, drawing, annotating and more!

- **Video breakout rooms:** Create smaller teams to collaborate and learn from one another, all within the same meeting or training session.

- **Co-annotation:** Draw directly on the shared screen so that notations are visible to all attendees.

- **Unlimited cloud storage:** Record as many lessons as you like with unlimited cloud storage for videos, audio, file sharing and more.

- **Multi-sharing:** Allows multiple participants to share their screen at the same time.

- **Recording class sessions:** Save your session for students to watch later.

- **Any device:** Mobile phones, Mac, PC, Chromebooks, iOS, and Android.

- **Closed captioning and accessibility support:** Ensure all students can participate equally.

- **Group and individual messaging:** Send messages, files, or images with class groups or individuals.

- **Polling:** Engage your students with quick polls, giving everyone a chance to participate.

- **Dashboards/management tools:** View information ranging from overall usage to live in-meeting data.

- **Learning tools integrations:** Schedule meetings from Moodle, Canvas, Desire2Learn, or Blackboard.

- **200+ pre-built integrations:** Google Chrome, Gmail, Microsoft Office, Outlook, Teams, Canvas, Coursera—you name it, we've probably built an integration for it!

- **Easy user management and Single Sign-on:** You barely need a manual to get started.

- **Security:** Seven layers of cloud security built into the product to keep your school's and students' data safe.

- **Full cloud phone system:** Reduce your telecom costs and ease budget pressures. Softphone software is included, and it can be securely activated on any device your teachers have.

OPTIONAL ADD-ONS IF YOU NEED:

- **Video webinars:** Registration, reporting, Q&A, polling, and more for up to 1,000 attendees, or broadcast on Facebook Live or YouTube to unlimited attendees.

- **RingCentral meeting connector:** Hybrid cloud service to run meetings on premises.

- **RingCentral Rooms™:** Simplify your classroom setup for video conferencing. Works on Mac, PC, and interactive touchscreen displays.

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact centre based on its Message Video Phone™ (MVP™) global platform. More flexible and cost effective than the on-premises PBX and video conferencing systems it replaces, RingCentral helps employees communicate across devices from wherever they are. RingCentral offers three key products. RingCentral MVP™ combines team messaging, video meetings, internet phone and other functionalities in a single interface. RingCentral Video™, along with its team messaging feature, enables Smart Video Meetings™. RingCentral Contact Centre™ gives companies the tools they need to connect with customers across channels. These are available on an open platform that integrates with hundreds of third-party apps and makes it simple to customise workflows. RingCentral is headquartered in Belmont, California, USA, and has offices around the world.
